**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Persistent and at times heavy rain will make for an unpleasant day with drenching conditions possible and conditions underfoot potentially hazardous. Windy conditions will make for fairly arduous walking on exposed terrain with buffeting of clothing. Balance may be affected at times. Persistent cloud, winds and rain will bring a cold feel.

Forecast for Thursday 11 Jul 2024

Weather: Cloudy with some patchy light rain first thing, but clearing through the morning to give a mainly dry day with some bright or even sunny spells.

Maximum wind: North to Northwest 25mph gust 35mph gradually easing to 15-20mph, gust 25-30mph.

Chance of cloud-free hill tops above 800m: 20% or less first thing, becoming 70% or more by midday.

Low cloud and visibility: Some early low cloud down to 300-400m or so will gradually lift and break through the day to leave summits mainly clear through the afternoon and evening, with the odd patch around 1000m. Visibilities will improve to good or very good through the day.

Temperature: **Glens:** Plus 10 to plus 14 Celsius
At 800m: Plus 5 to plus 7 Celsius.
Freezing level: Above summits.
